Projects

Life-Point

Github Repo: https://github.com/aholanda12/life-point | Link: https://life-point.herokuapp.com/

A wellness app dedicated to allowing users to organize their thoughts as well as assisting in practicing mindfulness. It is a journal, affirmation generator, wellness tracker as well as a mental health resource all in one space. Core responsibilities included front-end development, styling and assuring for both an easy user interface as well as a visually appealing application. Along with acquiring mental health resources and including quick access to using said sources. The app itself utilizes HTML, CSS, Node.js, Express, MySql, and Sequelize. It was deployed with Heroku, Handlebars, and API keys.

Life-Point V2

Github Repo: https://github.com/jerseyjackpot/life-point-v2 | Link: https://limitless-sea-16220.herokuapp.com/

An updated version of Life-Point with a smoother user interface, cleaner styling, a video recorder and was developed using React. Core responsibilities included converting certain front-end aspects and styling to be compatible with React. The app utilizes HTML, CSS, Node.js, Express, MongoDB React and was deployed via Heroku.

Safe Trails

Github Repo: https://github.com/CMFuertes/safe-trails | Link: https://zhim57.github.io/safe-trails/

Safe Trails is a simple app dedicated to helping users find a safe adventure outside during a pandemic. Users are able to look up the stats of their state of choice to see the total number of positive covid cases as well as the number of new cases. Users can access if they should visit their state of choice and use our app to find bike trails in the local area, along with the weather. Core responsibilities included writing the javascript code to make the functioning api key for the covid stats, as well as making for a user-friendly interface. The app utilizes HTML, CSS, Materialize, Javascript and a COVID-19 API Key as well as a weather API. It is deployed via Github.
